

成人高等教育学士学位英语考试

2024 年 真 题

(考试时间：120分钟 | 满分：100分)

Part I Dialogue Completion (10 points)

Directions: In this part, there are 3 dialogues with 3 or 4 blanks, each followed by 4 choices marked A, B, C and D. Fill in each blank with the choice that best suits the situation until the dialogue is complete. With Dialogue One, all the choices will have to be used. With Dialogue Two and Dialogue Three, one choice will be left unused. Mark your answer on the ANSWER SHEET with a single bar through the centre of the letter that indicates your choice.

Dialogue One

Lucas: Hi, Beth! Are you free this afternoon? We can watch a movie together.

Beth: Sorry, I'm not available.

Lucas: What are you going to do?

Beth: [1]

Lucas: Volunteer work? [2]

Beth: Of course! We'll have a charity food festival. We will sell dishes to raise money for sick children.

Lucas: [3]

Beth: We'll have it at the Star Shopping Mall.

Lucas: Sounds interesting. [4]

Beth: Yes! The more help, the better! Let's meet at 2 p.m. at the mall.

Lucas: No problem! See you then!

Beth: See you!

A. Can I join you?

B. Where will you have the event?

C. I'm going to do some volunteer work.

D. Can you tell me more about it?

Dialogue Two

Speaker A: Excuse me, sir. [5]

Speaker B: Certainly. Go along the street. When you see a hotel named Hanting, turn right and the railway station is on Renmin Road.

Speaker A: OK. [6]

Speaker B: Oh, it's about twenty minutes' walk.

Speaker A: I see. Can I take a bus?

Speaker B: [7] It will take you there.

Speaker A: By the way, where is the bus stop?

Speaker B: Over there. Look! The bus is coming.

Speaker A: Thank you very much.

Speaker B: You're welcome.

A. How long will it take?

B. The bus stop is on the left.

C. Could you tell me the way to the railway station?

D. You can take the No. 186 bus.

Dialogue Three

Alan: The summer vacation is coming. What's your plan?

David: [8]

Alan: Well, this is certainly a nice place. But why doesn't your grandpa move to the city?

David: He doesn't like the air in the city. [9]

Alan: It is true that the air in the countryside is fresher.

David: And he prefers the relaxing pace of life in the countryside.

Alan: [10]

David: I always lie back and enjoy the peace of the summer evening.

Alan: I also want to go to the countryside for a few days.

David: Really? How about going there with me?

Alan: Thanks very much. I'd love to.

A. When will you set off?

B. What do you usually do when you are there?

C. He said the air pollution in the city was serious.

D. I will stay at my grandpa's house in the countryside for a few days.

Part II Reading Comprehension (40 points)

Directions: There are 4 passages in this part. Each passage is followed by 5 questions or unfinished statements. For each of them there are 4 choices marked A, B, C and D. Choose the best one and mark your answer on the ANSWER SHEET with a single bar through the centre of the letter that indicates your choice.

Passage 1

Aging is the major risk for many types of cancer, that is to say, the older you get, the more likely you are to be diagnosed. And increasingly, experts recognize that age is more than just the number of candles on a birthday cake. It's also the wear and tear on the body, caused by lifestyle, stress and biology, which is sometimes referred to as a person's biological age.

"We all know cancer is an aging disease. However, it is really coming to a younger population. So whether we can use the well-developed concept of biological aging and apply that to the younger generation is a really untouched area," said Dr. Cao, an associate professor of surgery at the Washington University School of Medicine in St. Louis and senior author of the new research, which was presented on Sunday at the American Association of Cancer Research's annual conference in San Diego.

Cao and her team found that people, born in 1965 or later who are around 60 now, were 17% more likely to show accelerated aging than those born from 1950 through 1954.

After adjusting the data, the researchers found that accelerated aging was linked with increased risk for cancer. But she also admits that the study has limitations. For example, people in the study were not followed over time. The blood test results were from a single test, so they gave only a limited signal of risk, which may change. Ideally, she said, researchers would be able to follow the same group for years, taking blood samples along the way to get a more accurate trajectory(轨迹) of their risk.

Blaes, one of the team members, said that if you can find people who are at higher risk because their cells are aging faster, you can target lifestyle interventions(干预); things like healthy food, exercise and sleep and so on.

11. According to Paragraph 1, biological age is _____.

A. the number of years of physical wear and tear

B. the number of years when you are diagnosed with cancer

C. the number of candles on a birthday cake

D. a major risk for many types of cancers

12. According to Dr. Cao _____.

- A. the blood test results were not accepted
- B. the concept of biological aging is not applicable to the young
- C. the aging process cannot be intervened
- D. the accelerated aging indicates higher risk for cancer

13. The word "that" in Paragraph 2 refers to _____.

- A. the concept of biological aging
- B. the number of birthday cakes
- C. the younger generation
- D. the risk of cancer

14. The limitation of Cao's research is that _____.

- A. the researchers just relied on one blood type for test results
- B. the researchers did not follow the sample group over years
- C. the researchers only followed the sample population born in 1950
- D. the researchers are not from the same university

15. Blaes believed that lifestyle interventions _____.

- A. ought not to include blood tests
- B. could work against biological aging
- C. would fail if people were at higher risk of cancer
- D. should not be used if accelerated aging occurred

Passage 2

Hand washing is the single most effective thing to do to reduce the spread of infectious diseases. Failing to sufficiently wash hands contributes to nearly 50 percent of all food borne illness outbreaks, according to the U.S. Centers for Disease Control and Prevention.

Experts say it takes 15 to 20 seconds of vigorous hand washing with soap and water to effectively kill the germs which cause infections. Yet the study found that people washed their hands for, on average, only about six seconds. A third of people do not use soap when washing their hands and 10 percent do not wash their hands at all.

Professor Borchgrevink's team observed hand washing in toilets, in bars, restaurants and other public establishments.

Among the findings were that 15 percent of men didn't wash their hands at all, compared with 7 percent of women and when they did wash their hands, only 50 percent of men used soap, compared with 78 percent of women. People were less likely to wash their hands if the sink was dirty and hand washing was more prevalent earlier in the day.

Professor Borchgrevink, who worked as a chef before becoming a researcher, said the findings have implications for both consumers and those who operate restaurants and hotels. He said, "Imagine you're a business owner and people come to your establishment and get a food borne illness because they didn't wash their hands and then your reputation is on the line. You could lose your business."

16. According to the first paragraph, nearly 50 percent of the outbreak of food borne illness is caused by _____.

- A. failing to sufficiently wash hands
- B. failing to wash hands before handling the food
- C. eating food that contains certain types of bacteria or viruses
- D. eating uncooked food

17. To effectively kill the germs which cause infections, people should wash their hands _____.
A. with soap and water for about 6 to 10 seconds
B. with soap and water for about 15 to 20 seconds
C. with running water for about 15 to 20 seconds
D. with soap for about 15 to 20 seconds
18. According to the findings made by Professor Borchgrevink's team, _____.
A. 7 percent of men didn't wash their hands at all, compared with 15 percent of women
B. when they washed their hands, 78 percent of men used soap, compared with 50 percent of women
C. when they washed their hands, only 50 percent of men used soap, compared with 78 percent of women
D. when they washed their hands, only 60 percent of men used soap, compared with 80 percent of women
19. Where did Professor Borchgrevink probably work before he became a researcher?
A. In a factory. B. In a library. C. In a bank. D. In a hotel.
20. If people come to your establishment and get a food borne illness just because _____, you might lose your business.
A. the food was not cooked B. the sink was dirty
C. the chef didn't wash his hands D. they didn't wash their hands

Passage 3

Stepping onto one of the Uros islands in southern Peru can feel like walking on an elastic(有弹性的) castle. Your feet sink a bit into the soft floor, which trembles slightly when a motorboat speeds past. That's because this land is actually floating—on the largest lake in South America, namely Lake Titicaca, located 12,500 feet above sea level in the Andes Mountains.

The floating islands made of roots and reeds (芦苇) are currently home to about 2,000 residents. For locals, they form the foundation of their cultural identity(特征) which they have packaged into a tourist destination that is now important to their economy.

Today's locals build their islands the same way their distant ancestors built theirs: from totora, a water plant native to South America and found throughout Lake Titicaca. Each year, the Uros harvest fresh roots from the lakebed. The roots are then bound into piles covered with dried reeds 6 feet tall. This complicated skill is passed down from one generation to the next since before the Inca Empire came to an end in the 16th century.

Nelson Coila Lujano, who lives on an island called Utama with his wife and three kids, describes an idyllic childhood, being raised on the lake, "I used to listen to the songs of the birds and had a deep appreciation for the water, the sky, and the sun because they kept us safe, healthy and happy."

It's difficult to say just how many islands exist on the lake, partly because islands are periodically broken down and reconstructed, and partly because the residents are constantly moving back and forth between the water and the Peruvian mainland. The average island measures 21 by 32 yards, and is shared between three to eight different families. Each is connected to the lakebed via a network of ropes and anchors. The fluid structure dictates every aspect of Uros social life: Young couples seal their love in special romantic boats. And when two families have a quarrel, they can cut off their section of the island and reattach it elsewhere in the community.

21. According to the passage, which of the following statements is TRUE about the Uros islands?
A. They are drifting atop the largest lake in North America.
B. They are located 12,500 feet away from the Andes Mountains.
C. They are situated on the mainland of Peru.
D. They are packaged into a tourist attraction.

22. The Uros islands are built _____.

- A. only of fresh roots
B. from various water plants
C. from totora
D. only of dried reeds

23. The word "idyllic" in Paragraph 4 most probably means _____.

- A. dull and lifeless
B. dreamlike and unreal
C. boring and restless
D. peaceful and pleasant

24. Which of the following is NOT true according to Paragraph 5?

- A. The average size of the Uros islands is 21 by 32 yards.
B. The Uros social life is decided by the fluid structure.
C. We know the exact number of islands on the lake.
D. The Uros constantly move between the water and the mainland.

25. Which of the following is a possible title for this passage?

- A. Floating Islands
B. Ancient Castles
C. Harvesting Roots and Reeds
D. Building Homes on an Island

Passage 4

Science has questioned whether animals are capable of love. But anyone with a pet knows that animals feel a wide range of emotions, including anger, happiness, sadness, disgust, fear and surprise. "Animals have a strong bond to love each other," said Marc Bekoff, a professor of ecology and evolutionary biology at the University of Colorado and author of *The Emotional Lives of Animals*. Bekoff says there's considerable evidence that many animals are capable of feelings, and the latest science argues for the existence of love in many different species. Numerous species' brain chemistry is identical or similar to ours that allows us to feel love.

In his new book, *The Animal Manifesto*, Bekoff urges us to be more mindful of our interactions with animals. One way is to make a commitment to care for an animal that is suitable to our lifestyle. Dogs and cats form attachments to us and to each other and that's why we want to shower them with love, says Dr. Stephanie LeFarge, ASPCA (American Society for the Prevention of Cruelty to Animals 美国防止虐待动物协会) senior director of counseling services. "They sacrifice their lives for us, and put our needs in front of their own," she noted. "Animals are hardwired to greet each other," LeFarge said. "The animal is glad to see you, and it's not because you are going to whip out a treat." In fact, a nice greeting is an invitation to feel good and the beginning of the human-animal bond.

Bekoff says the best way for us to show our love for our companion animals is to treat them with respect and dignity, to bond with them, to feed them well and to provide them with comfort.

26. It can be inferred that the book *The Emotional Lives of Animals* mainly discusses _____.

- A. Animal's emotional capacity
B. Animal's professional skills
C. Animal's communicative capacity
D. Animal's reasoning ability

27. According to the passage, the latest science _____.

- A. questions whether animals are capable of love
B. indicates that animal's brain chemistry is totally different from ours
C. indicates that love exists in many animals
D. indicates that animals have a strong bond to love each other

28. The book *The Animal Manifesto* urges us to _____.

- A. create a strong bond with animals
B. create a strong bond with our pets
C. create a strong bond with our dogs
D. create a strong bond with our cats

29. According to Bekoff, the best way for us to show our love for our companion animals is _____.

- A. to respect them
B. to feed them well
C. to provide them comfort
D. all of the above

30. A more suitable title for the above passage is _____.

- A. Our Love to Animals
B. Animals are Capable of Love
C. Bond Between Humans and Animals
D. Bond Between Humans and Other Species

Part III Vocabulary and Structure (20 points)

Directions: There are 20 incomplete sentences in this section. For each sentence there are four choices marked A, B, C and D. Choose the ONE answer that best completes the sentence. Mark your answer on the ANSWER SHEET with a single bar through the centre of the letter that indicates your choice.

31. The reason _____ come last night is that he had to attend an important meeting.

- A. why he hasn't
B. why he hadn't
C. why he doesn't
D. why he didn't

32. They _____ us since five o'clock this morning.

- A. are helping
B. have been helping
C. have helped
D. have been helped

33. Without computers, much of today's advanced technology _____.

- A. would not have achieved
B. would not achieve
C. would not have been achieved
D. would not have been achieving

34. Which one do you think is _____, tea or coffee?

- A. best
B. the best
C. better
D. the better

35. _____, he is still working outside.

- A. Hot as the sun is
B. The sun is as hot
C. Hot is though the sun
D. Though is the sun hot

36. It was not until she took off her dark glasses _____ I realized she was an old friend of mine.

- A. the moment
B. the time
C. while
D. that

37. This book is for students _____ native language is not English.

- A. of whom
B. whose
C. which
D. that

38. My grandpa, together with my grandma, _____ still working in the garden now.

- A. has been
B. have been
C. is
D. are

39. Do you know _____?

- A. what time the movie starts
B. what time starts the movie
C. what time does the movie start
D. the movie starts what time

40. The letter _____ I received yesterday was from a friend of mine.

- A. when
B. where
C. which
D. what

41. All the children are getting excited and looking forward to _____ the new film and the film stars.

- A. see
B. seeing
C. be seeing
D. having seen

42. The police are busy _____ the crime at the moment.
A. looking up B. looking at C. looking out D. looking into
43. Robert surprised every one of us when he _____ the job of office manager.
A. turned out B. turned back C. turned down D. turned over
44. The repairman examined the car engine _____ but could not find anything wrong with it.
A. exactly B. approximately C. precisely D. thoroughly
45. I agree with you to a certain _____ but not entirely.
A. part B. level C. extent D. way
46. As they haven't a child of their own, they're going to _____ a little girl.
A. accept B. admit C. acquire D. adopt
47. He has been working _____ the experiment for over a month now.
A. out B. on C. in D. with
48. We finally _____ an agreement after three months of hard bargaining.
A. reached B. arrived C. did D. drove
49. The pilot of an airliner is responsible _____ the safety of the passengers.
A. for B. about C. to D. with
50. The forest fire caused by the volcano is too difficult to _____.
A. put off B. put on C. put out D. put up

Part IV Translation (15 points)

Directions: Translate the following passage into Chinese and put your translation on the ANSWER SHEET.

As a distinctive form of Chinese folk arts, paper-cutting dates back over 2,000 years. Paper-cutting is very likely to emerge in the Han Dynasty, after the invention of paper. Ever since then, it has been spread to many parts of China. The materials and tools used for paper-cutting are simple: paper and scissors. Paper-cutting works are often made of red paper, because red is connected with happiness in traditional Chinese culture. In this sense, red paper-cutting works are people's first choice to decorate doors and windows on festive occasions such as wedding and the Spring Festival.

Part V Writing (15 points)

Directions: You are to write in no less than 100 words on the topic of "**Do Libraries Become Useless at the Age of Information?**". You should base your composition on the clues given in Chinese below. Write your composition on the ANSWER SHEET.

Clues / 写作提示:

你认为图书馆在信息时代会变得无用吗? 请举例说明你的观点。
